STUDENT SURVEY

An online survey was distributed to students, mainly in the 5th, 7th, and 11th grades as well as to students enrolled in Adult School programs. Surveys were available in English and Spanish. Similar to other surveys, the questions focused on the existing functionality of the facilities. Within the survey, students were asked to rank the functionality of the following space types on a scale of 1 to 5:

- General Education Classrooms
- Food Service spaces
- Library
- Physical Education / Athletics spaces
- Specialized Project / Maker spaces
- the Site (parking, drop-off, playfields, restrooms, etc.)

The ranking scale was a selection of one of the following five categories:

1. Needs to be Replaced with New Construction
2. Needs to be Expanded
3. Large Enough, but Needs to be Reconfigured
4. Functions Well, but Needs New Paint and New Flooring
5. Excellent!

After each space ranking, students were asked to select from the list provided, one thing that they would change about the space in question.

The final question asked them to select their top 3 priorities regarding spaces that currently require the greatest amount of improvement or need to be added to their school.

3,889 total responses were submitted. See the following pages for the results.
